RECRUITMENT NOTICE

NUS Technology offers leading edge web and mobile software development services, as well as project management and product management. We proudly serve a diverse group of clients across the globe, from small businesses to large corporations.

Here at NUS, we live by the motto "Now You're Satisfied" because customer's satisfaction is our highest priority. We approach every challenge with passion and creativity, delivering excellent results in less time. We take the hassle and frustration out of client's development projects, allowing them to focus on business.

We take a strategic approach to managing our clients' projects and employ various management methodologies, such as Agile, PMBOK, and CMMI, based on clients' needs.

We employ a team of talented, passionate and skilled professionals who live and breathe NUS. Our staff works hard and plays hard, carrying out our commitment to excellence in every project.

We value our staff and strive to provide a dynamic work environment, where team members can excel, develop new skills and advance their careers. Our motto, "Now You're Satisfied" is reflected in how we treat our staff, as we aim to create an atmosphere where our employees are content, fulfilled and valued.

We offer training, coaching, tools and infrastructure to help our team members reach their personal and professional goals.
